Reference: Ferris-Kaan, Richard (szerk.)(1995): Managing Forests for Biodiversity; Technical Paper 8. Edinburgh

Short reference: Ferris-Kaan (szerk.) (1995)

First author: Ferris-Kaan, Richard

Year: 1995

Abstract

Tartalom:

Introduction

Richard Ferris-Kaan:

Forests and biodiversity - a brief review of the issues

Symposium Papers

Phil Radcliffe:

Ecological diversity in managed forests

Steven Cousins:

Biodiversity measurement

Terry Crawford:

Genetical aspects of small population size in relation to conservation

Michael Usher:

Species Richness and the application of island biogeography theory to farm woodlands

Graham Pyatt:

A biogeoclimatic ecosystem classification for Britain

Chris Nixon:

Biogeoclimatic ecosystem classification and forest management for biodiversity

Graham Gill and Simon Bell:

Environmental planning in forest management

Ian Spellerberg and John Sawyer:

valuation of forest resources and evaluation for conservation
