

ER-03 (HU)

Nagy Istrázsa-hegy Forest Reserve (Gödöllői-dombság)

core area: 44.5 ha; *buffer zone:* 111.0 ha; *total area:* 155.5 ha

Posted/updated: : 2020-11-09

Északi-középhegység forestry-based landscape classification

Pilisi Parkerdő Zrt. ; Duna-Ipoly National Park Directorate

History:

It was declared as a forest reserve by the Decree No. 14/2000 of the Ministry of the Environment (MK 2000/66: 4068-4072.)

Description:

1999

"The reserve is characterized by low productive stands that hard to be classified into forest types. The stand is partly degraded, somewhere open, juvenile elsewhere. The number of game stock is extremely high (the forest block of Gödöllői-dombság is functioning mostly as game preserve), thus there are practically no regeneration processes."

Horváth és Bölöni (2002) Az ER-ok kutatásszemponútú besorolása és rövid jellemzése 1999-ben
